

# CIMCO DNC-Max

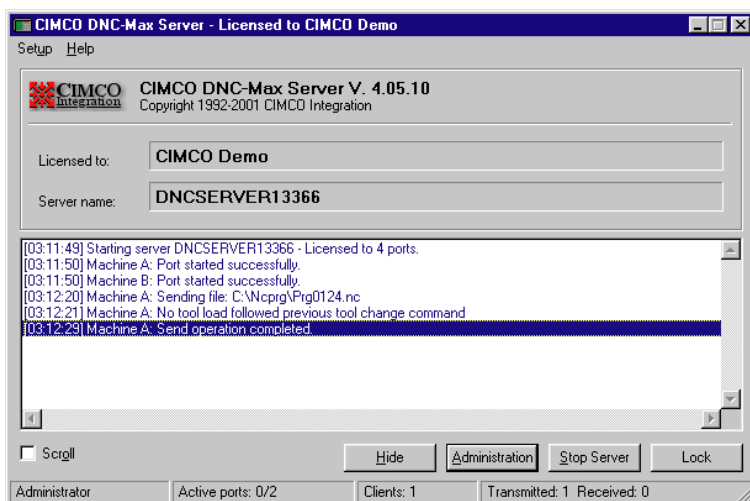

*The perfect DNC solution*

CIMCO Integration has been developing world-class DNC solutions for over a decade. DNC-Max v4 is the result of customer feedback, real-world application design, and our continued commitment to reliability.

DNC-Max is the only choice for those customers who demand flexibility, compatibility, expandability, and reliability. Whether you are migrating from an older DNC system or implementing your first DNC solution, DNC-Max is the right tool for the job.

*The DNC-Max control panel provides comprehensive system status information*

*DNC server status display*

- **DNC-Max provides a complete solution to your CNC program storage, retrieval, editing and backplotting requirements which seamlessly interface with your CAD/CAM systems.**
- **The advanced remote control features allow the CNC operator to initiate program transfer from the control using Remote Request and Auto Receive.**
- **Comprehensive program and status information is available directly on the control, so there is no need for the CNC operators to have access to the DNC server operator panel.**
- **The flexible Remote Request and Auto Receive configuration allows the operator to access any NC program on your network.**

*When Reliability Matters*

# CIMCO DNC-Max

The perfect DNC solution

**M**ultiple send/restart functions give the operator the ability to send from any point in file, specified by line number, block number or tool change. These functions can also be initiated remotely!

DNC-Max provides comprehensive logging of system activity, and the ability to send status reports directly to CNC operators.

## DNC-Max features

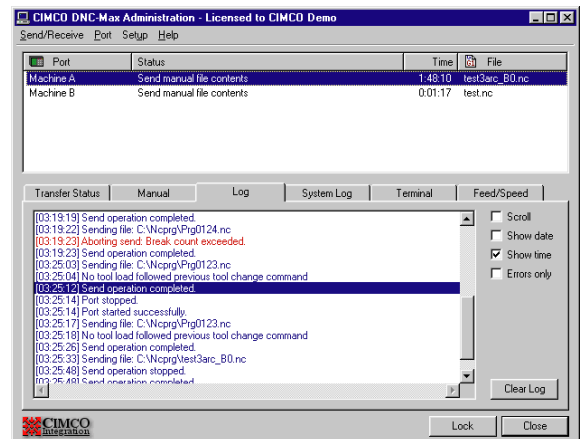

- Simultaneous transfer/drip-feed of CNC programs and data to 256 machines or devices per PC.
- Initiate program transfer from the CNC control using remote program request and auto receive.
- Start and restart a program from any point in the file, e.g. tool breakage.
- Detailed system and event log for every machine.
- Integration with CAD/CAM, reader/puncher, etc.
- Standard Windows user interface, easy and user-friendly operation with on-line help.
- Network support (Microsoft, Novell, UNC...)
- Designed for Microsoft Windows 95, 98, NT and 2000.
- Worldwide support, e-mail, voice-mail and on-site.
- Protocols: Heidenhain, Mazak, LSV2, etc.

## Optional CNC editor

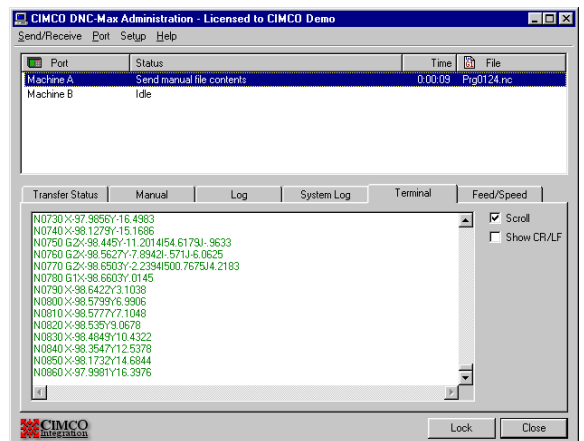

- Fast and flexible CNC editor.
- Opens and handles files fast.
- Unlimited file size.
- Advanced NC aware file compare.
- User definable color schemes.
- Integrated backplotting.
- Math functions: Scale, rotate, mirror, etc.

## Other related products

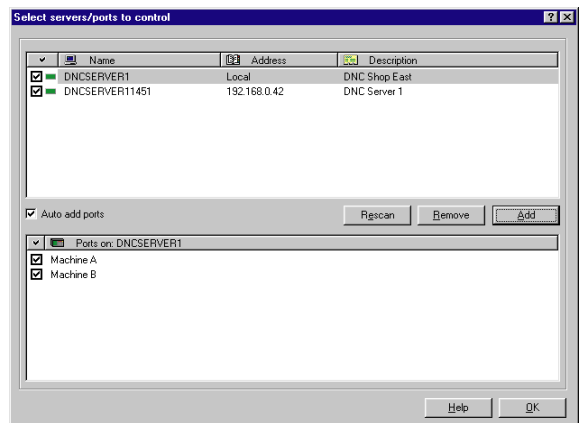

- CIMCO FTP Server.
- CIMCO NFS Server.

DNC-Max provides comprehensive logging of system activity

Monitor transmissions on any serial port anywhere on your network

User defined access to any DNC server on your network
